Print CSS
Cheat Sheet

COMP 20

① Recall the HTML commandments;
fail example

② Every HTML element
block level → div = generic block elem
inline → span = generic inline elem
why? denote sections on page

③ Why is mixing style in HTML bad?

④ Why CSS?

⑤ How CSS works
- Box model for every CSS HTML element
- rule → h1 {color: blue; font-size: 48px;}
  selector   declaration   property value
- "Last declaration wins"
  (especially on a site w/ many

⑥ Selectors

id (also an HTML attribute) → class

defined w/ #

defined w/ "

should be used only once, for a single unique elem

to style group of elements (many)
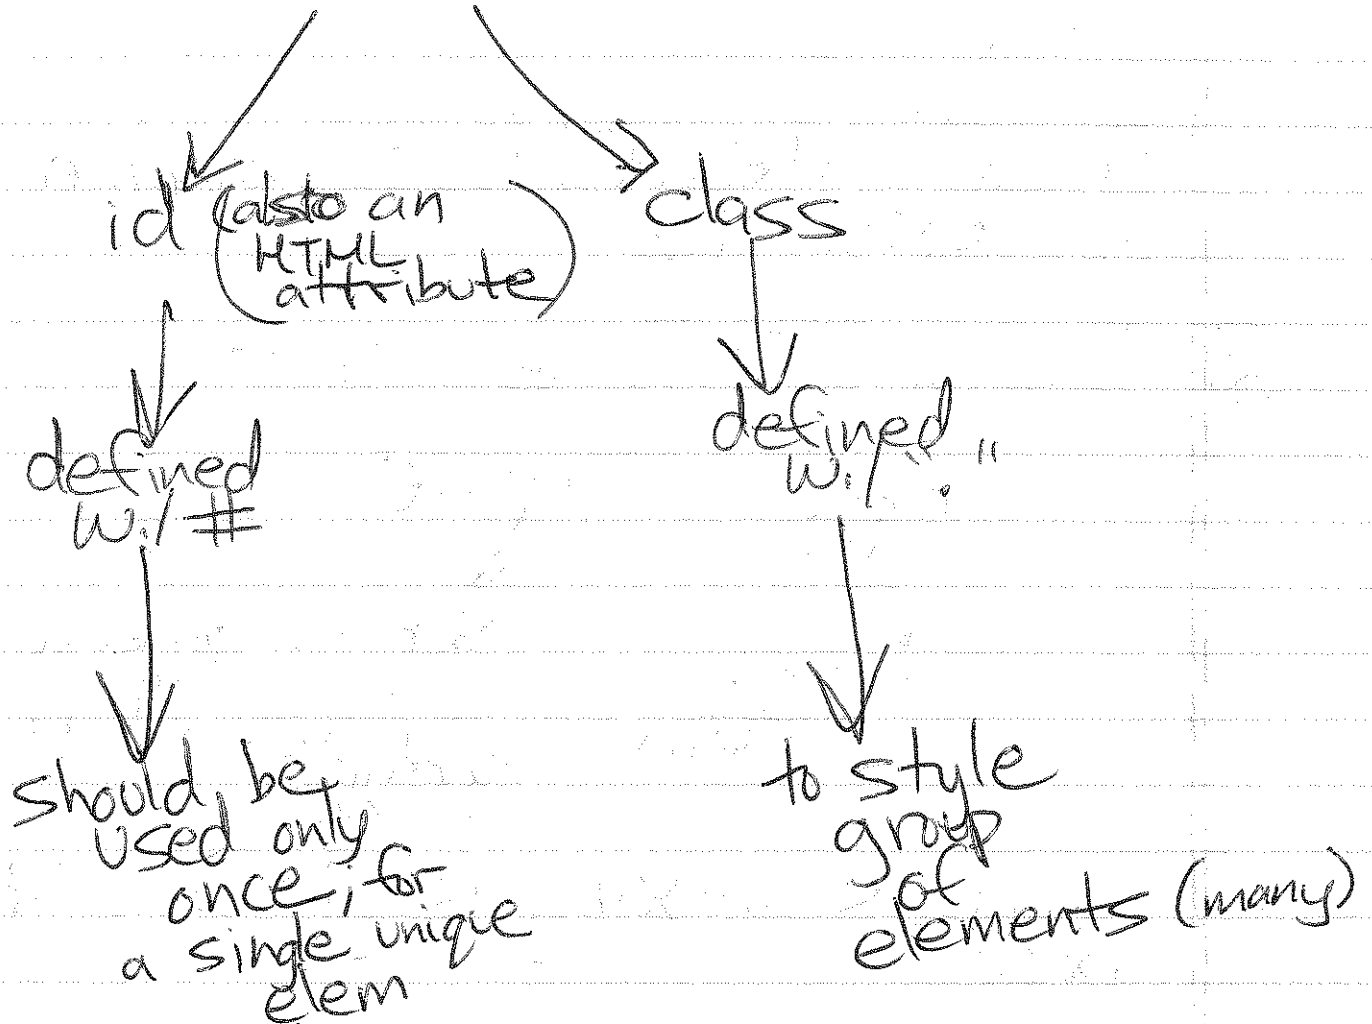

⑦ Should you use a separate file for CSS?

<link rel="stylesheet" href=" ">

⑧ "Or" and "concatenated" compositions
